Geotechnical & Environmental Solutions (GES) & Majellan Geotechnical and Environmental Services Co. (MGES) are one of the leading Geosynthetic contractors who are specialized in executing Geotechnical & Environmental projects related to the use of Geosynthetic materials from the designing stages to full operations of various applications mainly used in environmental, earthworks and foundation engineering, hydraulic engineering and road constructions projects.

To achieve this, the company has implemented and maintain a fully documented quality management system based on internationally recognized standard ISO 9001:2015. Providing quality services to all interested parties is the responsibility of management and employees alike.

It is our policy to:

- Continually improve all processes, products and services, to support the company strategic directions.
- Provide a framework to constantly establish, improve and monitoring the effectiveness of quality objectives and eliminate the deviations.
- Deliver on-time & on-quality products and services that meet or exceed our customers' expectations and enhance customer satisfaction.
- Enable and engage our people at all levels to continuously improve quality and operational performance along the whole value chain from suppliers to customers.
- Improve competency of the employees and provide opportunities for growth.
- Comply with all relevant local and international legal and other requirements.

**GES /MGES** recognizes that the continued success of its developments is dependent upon commitment to the quality management system requirements and all those whom endeavor to carry it out. We understand that our customers are who we serve and depend upon for our company's continued financial success.
